## Casper Neighborhood Opportunities Workshops

**Casper, Wyoming (September 28, 2016)** – The City of Casper faces important choices in planning for future growth and development. We want to hear your ideas about the direction that future growth should take.

Are there areas where transportation improvements are needed? What pathway connections are priorities to you? Where should we encourage development and investment in our community's future? These are just a few of the questions that we need feedback on.

The community has already told us what they love or would improve about Casper, identified what they enjoy about their neighborhoods, and helped create visions for the future. City staff and representatives from consulting firm Logan Simpson now request input on these Neighborhood Opportunities at three upcoming public workshops:

**Monday, October 3 – Pizza Party! (Free)**

**5 pm – 7 pm**

**CY Middle School in the Commons (parking on the south side)**

**2900 Cyclone Dr.**

**Tuesday, October 4 – Ice Cream Social (Free)**

**1 pm – 3 pm**

**Senior Center**

**1831 E 4<sup>th</sup> St.**

**Wednesday, October 5 – La Cocina Catering (Free)**

**5:30 pm – 7:30 pm (Doors open at 5:00)**

**Imitate the Image Church**

**1124 North Elma St.**

The meetings will be a workshop style format where participants are invited to join in small group discussions. In addition to providing information on citywide plan modifications, educational information about each vision and big idea will be presented, allowing each participant to discuss the trade-offs and potential benefits that could result from each possible investment. Light refreshments will be available.

There will also be opportunities to participate online. Don't forget to visit the Generation Casper website, [www.generationcasper.com](http://www.generationcasper.com) to find out about upcoming meetings, online surveys, and plan updates.

Make sure you have a hand, and a voice, in shaping Casper's future and get involved today!
