

Casper Fire Alarm Inspection/Repair Addendum #2

- In Section 3 – Bid Proposal, there is a line for a cost for inspection of the alarm system at the Casper Transit Office. This is not required at this time.
- Is there any other information available about the alarm systems at the buildings within the contract?
 - I have created a spreadsheet with all of the information that I have regarding the alarms at the needed locations.
- Is City Hall included?
 - Not at this time. City Hall is currently being renovated and will be added to the contract for 2025. Once all work is done, the City and the selected Contractor will walk the building to get a price for inspection.
