2016 Casper Mid-block Traffic Volume Counts

Introduction

224 mid-block traffic counts were collected across the Casper Metropolitan area from April 25th to April 28th, from May 2nd to May 5th, and on May 18th, 2016. This report presents the 24 hour traffic volumes that were counted at each location during the count period.

Terminology

Average Annual Daily Traffic (AADT)

AADT is the average 24-hour volume at a given location over a full 365-day year.

Average Daily Traffic (ADT)

ADT is the average 24 hour volume recorded for some period less than a year. An ADT can be calculated for a month, a week, or for two days.

Traffic volumes in Wyoming during the summer months are typically higher than AADT and winter volumes are typically lower than AADT. The Wyoming Department of Transportation considers spring and fall counts a good estimate of AADT volumes.

Equipment

Pneumatic hose counters were used to collect the 2016 data presented in this report.

Data

All volume data collected in 2016 were recorded by direction in 60 minute intervals for a 24 hour period.
